

Installing App on an Apple device

*Installing an App on an Apple device
(instructions sourced from [wikiHow](#))*

1 Open the app store by tapping on the iTunes app store icon. The iTunes Store app icon resembles a white “A” with a blue background and is call App Store. All apps for apple devices are located in the iTunes store

2 The quickest way to find the app you wish to install is to use the search function. The search function located on the bottom right of your screen and looks like a magnifying glass. Tap the magnifying glass.

3 Tap the search bar. The search bar is a grey text field with “App Store” written in it. Once you tap it, the keyboard will appear.

4 Type in the name of the app you would like to download and tap the icon once you have found it

5 Once you have tapped the icon, a window with the app details will appear on your screen. Tap “Get” (for Free apps), or “the price” button which is located to the right of the app name (at the top of the screen).

6 When prompted, enter your Apple ID password. This will download the app to your device

7 Once downloaded, you can open the app. You can do this directly from within the store by tapping “Open” or by navigating to your home screen and tapping the app icon.
